## Professional Summary

Full Stack Web Developer with 1+ year of hands-on experience in building responsive and scalable applications using React.js, Next.js, Node.js, NestJS, and databases like MongoDB and PostgreSQL. Skilled in developing secure RESTful APIs, role-based authentication, and delivering user-friendly interfaces in professional team environments.

## EDUCATION

**COMSATS University Islamabad, Abbottabad Campus — Pakistan** Sep 2023 – Present

Bachelor of Science in software engineering

Relevant Coursework: Database, OOP, DSA, Programming Fundamentals, Operating System, Web development, Mobile App development.

## WORK EXPERIENCE

**Web developer - Firlas.tech, Abbottabad** March 2025 - Present

Developing responsive user interfaces using React.js and Tailwind CSS on the frontend. Building and integrating secure RESTful APIs using Node.js and NestJS on the backend. Working with MongoDB and PostgreSQL for database management. Collaborating with the team in a professional environment, improving communication, problem-solving, and time management skills.

**Web Developer (Intern) – Firlas.tech, Abbottabad:** Dec 2024 -March 2025

I worked as a Web Developer Intern at Firlas.tech, where I learned and implemented frontend development using React.js and Next.js along with Tailwind CSS. On the backend, I worked with Node.js and gained hands-on experience integrating APIs and managing data with MongoDB, while also focusing on learning PostgreSQL. This role allowed me to build UI components, connect them with backend services, and improve my skills while working in a professional team environment.

## SKILL SET

Languages: Javascript(react,next.js),C,C++,java.

Frontend: HTML, CSS, JavaScript, React.js, Next.js, Tailwind CSS, ShadCN, Admin dashboards

Backend: Node.js, NestJS, REST APIs, OAuth 2.0, web sockets, stripe

Databases: MongoDB, PostgreSQL

Programming: JavaScript, TypeScript

Others: Typescript, MVC Architecture, Authentication (JWT & Cookies), Responsive Web Design, Postman, Swagger, VS Code, Linux (Basic)

## PROJECTS COMPLETED

**Corporateeasy – Company Registration & Management Platform , Firlas.tech Abbottabad**

Worked as a Full-Stack Developer on Corporateeasy, building the company registration form and integrating Stripe for secure payments. Developed Admin and Company panels with role-based access using Next.js and Tailwind CSS, while implementing backend logic in NestJS and PostgreSQL for authentication, data management, and payment workflows.

**SehatYar – Digital Healthcare & Clinic Management System , Firlas.tech Abbottabad**

Worked as a Full-Stack Developer on SehatYar, a healthcare platform for patients, doctors, receptionists, and admins. Developed modules for authentication, multi-clinic management, appointments, electronic medical records (EMR), AI-assisted summaries, and billing. Built the frontend with Next.js and Tailwind CSS, and the backend with NestJS,

PostgreSQL, and TypeORM, ensuring secure APIs and role-based access control

#### **Gigjives - Project Management tool, Firdaus.tech Abbottabad**

Worked as a Frontend Developer on Gigjives – Project Management Tool, building role-based modules for Super Admin, Admin, Manager, and Employee. Developed responsive dashboards, user management, and task workflows using Next.js, Tailwind CSS, and shadcn UI, ensuring a smooth and intuitive user experience.

#### **Shirka Noura – Appliance & AC Repair Website, Riyadh**

Developed the complete website using Next.js and shadcn/ui, with responsive layouts and interactive UI components.

Integrated EmailJS for contact forms and WhatsApp for instant customer support.

Optimized performance with clean, scalable code for cross-device compatibility and a smooth user experience.

#### **Portfolio Website – Client Project**

Developed and deployed a professional portfolio website for a client using Next.js, Tailwind CSS, and TypeScript.

Configured custom domain and DNS settings on Hostinger and deployed on Vercel, ensuring high performance, responsive design, and seamless user experience.

#### **Asrar – Booking Portal Website, Firdaus.tech Abbottabad**

Worked as a Full Stack Developer on Asrar – Booking Portal, a platform where hotels book cars for their customers by providing customer details. Developed hotel-side features for creating and managing bookings, while on the admin side implemented driver assignment, fare management, booking status updates, and CSV exports. Built with Next.js, Tailwind CSS, shadcn UI on the frontend and NestJS with PostgreSQL on the backend with secure authentication and role-based access.

#### **Aerona – Hotel Booking Website, Firdaus.tech Abbottabad**

Worked as a Frontend Developer on Aerona, a travel booking platform. Built responsive layouts and interactive UI components for hotels, flights, and rentals. Optimized performance with clean, scalable frontend code for cross-device support. Collaborated with designers and backend team to deliver a smooth user experience.

#### **Lemara – Commercial Website, Firdaus.tech Abbottabad**

Created in Next.js to showcase commercial property listings with performance-focused design. Focused on responsive UI and clean navigation experience.

#### **S4 – Job Posting Platform, Firdaus.tech Abbottabad**

Worked as a Full Stack Developer on S4-Job posting platform using React and Tailwind CSS for the frontend, and NestJS for the backend. Implemented QR code generation, dynamic navigation, and Google Maps integration with Firebase API for real-time data synchronization. Designed a responsive user interface ensuring seamless performance across devices.

#### **AI Image Generator SaaS – Personal Project**

Developed a full-stack SaaS application using Next.js and Node.js that generates images from user-provided text prompts using an AI image generation API (Dropbox API).

Implemented user input handling, dynamic image rendering, and prompt history storage. Designed a clean and responsive user interface with Tailwind CSS for a smooth user experience.
